

Charter Introduction:

Identify capabilities and areas of potential instability of the “rest api todo list manager”. Identify documented and undocumented “rest api todo list manager” capabilities.

For each capability create a script or small program to demonstrate the capability.

Exercise each capability identified with data typical to the intended use of the application.

Environment:

MacOS, Screen Resolution 1440x900 (Arturo Mory Ramirez)

MacOS, Screen Resolution 2560x1600 (Yida Pan)

Testers:

Arturo Mory Ramirez (260989669)

Yida Pan (260942327)

Date:

19:30 PM, 01/02/2024

Run:

java -jar runTodoManagerRestAPI-1.5.5.jar

Area:

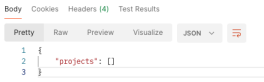

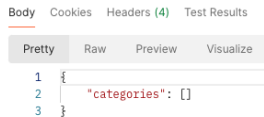

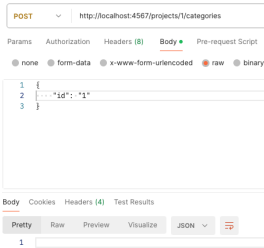

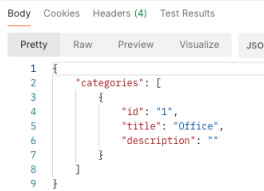

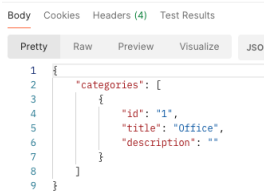

Interoperability of the main functions and capabilities of the system

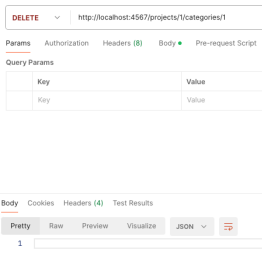

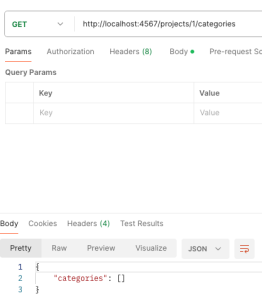

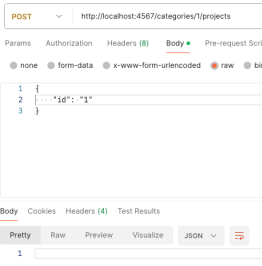

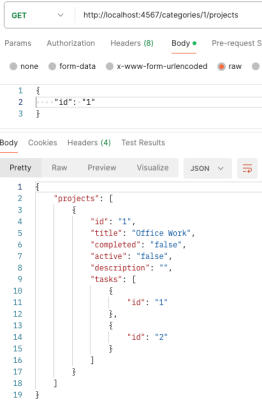

Session Breakdown:

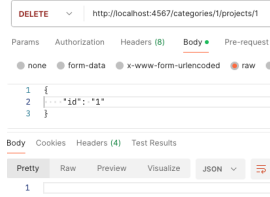

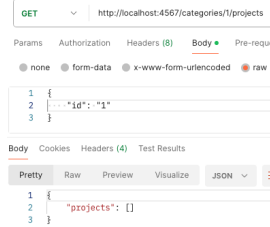

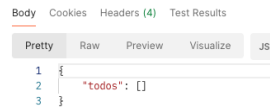

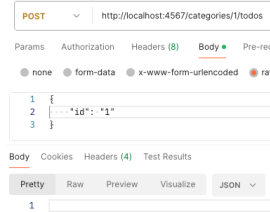

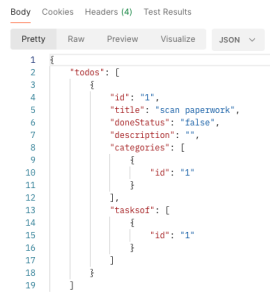

45 minutes total

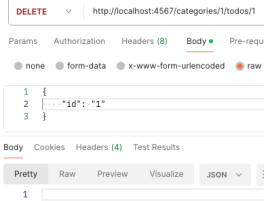

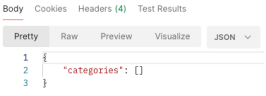

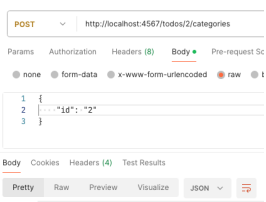

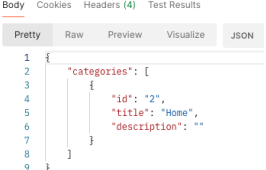

Test Detail:

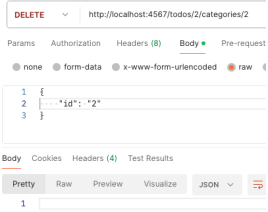

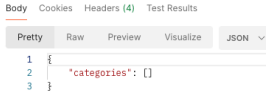

Time	Tester	Request	Type	Note	Output in JSON file
19:30	Arturo	http://localhost:4567/projects	GET	Worked as expected, gets all the projects	<div><div>BodyCookiesHeaders (4)Test Results</div><div><div>PrettyRawPreviewVisualizeJSON</div><div><pre>1 { 2 "projects": [3 { 4 "id": "1", 5 "title": "Office Work", 6 "completed": "false", 7 "active": "false", 8 "description": "", 9 "tasks": [10 { 11 "id": "1" 12 }, 13 { 14 "id": "2" 15 } 16] 17 } 18] 19 }</pre></div></div></div>

19:31	Arturo	http://localhost:4567/categories	GET	Worked as expected, gets all the categories	 <pre> 1 { 2 "categories": [3 { 4 "id": "1", 5 "title": "Office", 6 "description": " " 7 }, 8 { 9 "id": "2", 10 "title": "Home", 11 "description": " " 12 } 13] 14 } </pre>
19:32	Arturo	http://localhost:4567/categories/projects	GET	Worked as expected, gets all the projects in the categories (empty)	 <pre> 1 { 2 "projects": [] 3 } </pre>
19:33	Arturo	http://localhost:4567/projects/categories	GET	Worked as expected, gets all the categories in the projects (empty)	 <pre> 1 { 2 "categories": [] 3 } </pre>
19:35	Arturo	http://localhost:4567/projects/1/categories	POST	Create relationship between a category and project with no category id, error message as expected	 <pre> 1 { 2 "errorMessages": [3 "title : field is mandatory" 4] 5 } </pre>
19:37	Arturo	http://localhost:4567/projects/1/categories	POST	Create relationship with a proper id of "1"	 <pre> 1 { 2 "id": "1" 3 } </pre>
19:39	Arturo	http://localhost:4567/projects/1/categories	GET	Verify that for project id 1 a category has been created (successful relationship)	 <pre> 1 { 2 "categories": [3 { 4 "id": "1", 5 "title": "Office", 6 "description": " " 7 } 8] 9 } </pre>
19:40	Arturo	http://localhost:4567/projects/categories	GET	Verify that for all the projects the category just created appears too	 <pre> 1 { 2 "categories": [3 { 4 "id": "1", 5 "title": "Office", 6 "description": " " 7 } 8] 9 } </pre>

19:42	Arturo	http://localhost:4567/projects/1/categories/1	DELETE	Delete the relationship between the category and the project	
19:44	Arturo	http://localhost:4567/projects/1/categories	GET	Verify that it was deleted for projects and that categories is now empty	
19:45	Arturo	http://localhost:4567/categories/1/projects	POST	Create new category of id 1 in project for category of id 1	
19:47	Arturo	http://localhost:4567/categories/1/projects	GET	Verify that relationship has successfully been created	

19:49	Arturo	http://localhost:4567/categories/1/projects/1	DELETE	Delete the relationship of project id 1 for category id 1	 <pre> DELETE http://localhost:4567/categories/1/projects/1 { "id": "1" } </pre>
19:51	Arturo	http://localhost:4567/categories/1/projects	GET	Verify that it was deleted for categories of id 1 and that projects is now empty	 <pre> { "projects": [] } </pre>
19:52	Arturo	http://localhost:4567/categories/todos	GET	Verify that it was deleted for categories of all ids and that projects is now empty	 <pre> { "todos": [] } </pre>
19:53	Arturo	http://localhost:4567/todos/categories	GET	Retrieve successfully all categories for todos	 <pre> { "categories": [{ "id": "1", "title": "Office", "description": "" }] } </pre>
19:55	Arturo	http://localhost:4567/categories/1/todos	POST	Create a new todos of id 1 for category of id 1	 <pre> { "id": "1" } </pre>
19:57	Arturo	http://localhost:4567/categories/1/todos	GET	Verify that the relation has successfully been created as now there is a todos for category 1	 <pre> { "todos": [{ "id": "1", "title": "scan paperwork", "doneStatus": "false", "description": "", "categories": [{ "id": "1" }], "tasksof": [{ "id": "1" }] }] } </pre>

19:59	Arturo	http://localhost:4567/categories/1/todos/1	DELETE	Delete the relationship of todos id 1 for category id 1	
20:01	Arturo	http://localhost:4567/categories/todos	GET	Verify that it has been successfully deleted and that todos is now empty for all categories	
20:03	Arturo	http://localhost:4567/todos	GET	Retrieve successfully all the todos	
20:04	Arturo	http://localhost:4567/todos/2/categories	GET	Retrieve as expected an empty categories for todos of id 2	
20:06	Arturo	http://localhost:4567/todos/2/categories	POST	Create a category with id 2 for the todos id 2	
20:08	Arturo	http://localhost:4567/todos/2/categories	GET	Verify that the relation for todos id 2 and a category of id 2 has successfully been created	

20:10	Arturo	http://localhost:4567/todos/2/categories/2	DELETE	Delete this category of id 2 for the todos of id 2	 <pre> DELETE http://localhost:4567/todos/2/categories/2 { "id": "2" } </pre>
20:12	Arturo	http://localhost:4567/todos/2/categories	GET	Verify that the relation has been successfully deleted by retrieving a now empty categories for todos id of 2	 <pre> { "categories": [] } </pre>
20:15	Arturo	http://localhost:4567/todos/categories	GET	Verify that only the relation that we deleted has been successfully deleted, leaving with another already existing category of id 1 for todos of id 1	 <pre> { "categories": [{ "id": "1", "title": "Office", "description": "" }] } </pre>
